DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 30 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Alderson et al., JACS, 87(24), 1965 (Alderson).

Alderson teaches the distillation of a reaction product of methyl acrylate dimerization reaction from rhodium and ruthenium catalysts, see page 5643, right column, bottom.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 19-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alderson in view of U.S. 5,099,048 to Brookhart et al. (Brookhart).

The rejected claims cover specific rhodium catalyst not specifically disclosed by Alderson. However, it is for this proiposition that the examiner joins Brookhart.

Specifically, Brookhart teaches that the claimed catalysts are useful for olefin dimerization, see columns 1 and 2. Therefore it would have been obvious to substitute the catalyst of Brookhart for those disclosed by Alderson with a predictable result of obtaining the desired dimmer product.

Claims 9-18 and 32-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alderson in view of Brookhart, in further view of Catalysis in Kirk-Othmer Encyclopedia of Chemical Technology, pp. 200-254, Copyright © 2002 by John Wiley & Sons, Inc, Article Online Posting Date: August 16, 2002 (Kirk Othmer).

The rejected claims cover those embodiments wherein the dimerizeed product is further hydrogenated. In this regard, Kirk Othmer teaches that rhodium complexes are routine for hydrogenation of di-functionalized olefins, see pp. 210-213. In this connection, it would have been obvious to use rhodium complexes to further provide saturated compounds since Kirk Othmer teaches that this step is routine for providing hydrogenated products.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct

Application/Control Number: 10/561,611

Art Unit: 1621

from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-34 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-36 of copending Application No. 10/560740 Although the conflicting claims are not identical, they are not patentably distinct from each other because the conflicting claims recite a process for the dimerization of olefinic compounds, hydrogenation and separation from rhodium catalysts, and therefore render the instant claims prima facie obvious.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl J. Puttlitz whose telephone number is (571) 272-0645. The examiner can normally be reached on Monday to Friday from 9 a.m. to 5 p.m.

Art Unit: 1621

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yvonne Eyler, can be reached at telephone number (571) 272-0871. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
